Introduction

Allspot - it is blockchain secured payment platform adjusted for international trading. The platform is corresponding to traditional banking practices such as “letter of credit” (L/C) A.K.A “documentary credit” payment mechanism and follows most of ISBP and UCP600 rules.

Decentralized Allspot Payment Platform (DAPP) as well as traditional (L/C) will provide economic guarantee to the seller/exporter in exchange to the documents which are specified in the contract with the buyer/importer.

The seller/exporter will be able to withdraw his assets only after buyers/importers approval that the documents are satisfying his needs. DAPP allows trust less B2B trading across the globe secured by Tron Blockchain.

Allspot ALT token - TRC-10 token for contact interactions and premium features purchases

Understanding the Features

- Trusted and reliable technology that guarantee safer, worthwhile and simple funds transfer.
- Run business contracts with your partners on strict smart contract algorithm.
- Upload contract related documents to DAPP and proceed to funds withdrawal.
- Compatible with any ERC-20 TRC-20 stablecoins

DAPP Development Roadmap

Decentralized Allspot Payment Platform

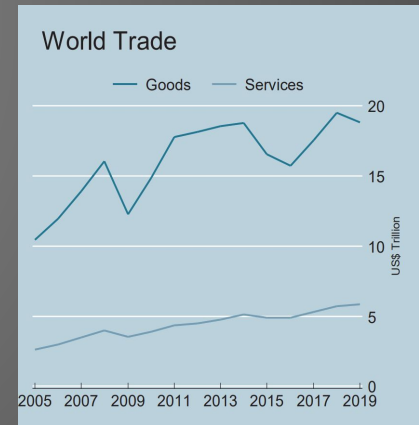

Target Audience

Traders, Suppliers, Manufacturers, Entrepreneurs,
Distributors, Importers, Exporters, Shipping and
Logistics Agents, Freight and Cargo
Transportation Companies,
International Ports and Canals,
Corporations.

Market Widespread

International trade in goods is increasingly linked to imports and exports of developing countries. After the 2008 crisis, South-South trade rebounded promptly to pre-crisis levels, and continued to grow to reach close to US\$ 5 trillion in 2014

Source: UNCTAD secretariat calculations based on COMTRADE and UNCTADStat data, UNCTAD estimates based on national statistics, Changes are estimated from HS6 digits data of China, European Union, and United States. Data excludes intra-European Union trade.
